InMotion Global TMS selected as 2009 Top 100 Logistics IT Provider by *Inbound Logistics* magazine

CEO credits the award to industry-leading technical innovation, teamwork and the continued success of InMotion Global TMS customers

Saint Petersburg, FL – April 8, 2009. InMotion Global TMS, a division of Interstate Transport, Inc., the leading third-party logistics and software development company, was named by *Inbound Logistics* magazine, as one of the 2009 Top 100 Logistics IT Providers.

Felecia Stratton, Editor, *Inbound Logistics* magazine stated, “Solutions providers such as InMotion Global TMS empower logistics and supply chain management, continuing to offer innovative and practical solutions in the face of demand volatility. 2009 continues to be a year where every opportunity and efficiency must be seized and InMotion Global TMS consistently provides the kinds of technology solutions business logistics managers need to successfully manage their global enterprises. As shippers, carriers, and 3PLs increase their use of logistics IT, InMotion Global TMS is flexible and responsive, anticipating customers' evolving needs. That's why *Inbound Logistics* editors have recognized InMotion Global TMS as one of 2009's Top 100 Logistics IT Providers.”

Every year, *Inbound Logistics* editors recognize 100 logistics IT companies that support and enable logistics excellence. Selecting the annual Top 100 Logistics IT providers is no small task, given the pace of change and the number of new entrants in the logistics technology market. *Inbound Logistics* editors whittled this year's list through a comprehensive process of evaluating questionnaires, conducting research, and soliciting reader feedback. The goal is to provide a balanced and accurate assessment of its readers' needs and the logistics IT companies best suited to meet their specific requirements. InMotion Global TMS delivers the simplicity, ROI and efficient implementation that *Inbound Logistics'* readers value.

Tim Higham, CEO of InMotion Global TMS, said, "We are honored and grateful to be recognized as an industry leader in transportation services, technical solutions, and best practices. Our devoted team continues to develop and deliver innovative solutions and services to our clients that help lower their transportation costs, improve their customer service performance, and gain visibility into transportation management processes for continued improvement."

InMotion Global TMS is a fully hosted, web-based Transportation Management System that requires no software or hardware installation, making it a true, on-demand TMS that can be implemented in minutes. The system includes hundreds of features that centralize and streamline the entire transportation process from load inception through final delivery, allowing shippers to seamlessly manage their entire transportation operation. Whether the logistics operation is conducted out of one location or across multiple locations, users log in through their web-browsers and have instant, real-time access to every aspect of their operation, providing them with total situational awareness.

One of the differentiating factors implemented by InMotion Global TMS is that it uses the latest ASP.NET technology, thus providing a rich user interface including cascading menus, predictive typing and other user-preferred capabilities. Moreover, using the latest in "web-services" architecture, InMotion Global TMS is able to seamlessly access a myriad of third-party data and information for the user.

The *Inbound Logistics* annual Top 100 issue highlights providers who offer innovative solutions that drive advances in the practice of logistics. Companies are evaluated on platform, price, industries, compatibility, capabilities, solutions, and functionality. *Inbound Logistics'* 2009 Top 100 Logistics IT Provider list appears in the publication's April 2009 issue.
