

# INMOTION GLOBAL TMS™

THE WORLD'S MOST ADVANCED TRANSPORTATION MANAGEMENT SYSTEM

- No upfront fees, no load fees, no maintenance fees
- Unlimited loads and locations
- On-Demand TMS: fully hosted & web-based, nothing to install
- Save \$272 per load shipped (actual average user results)

## INMOTION GLOBAL TMS™

Introducing InMotion Global TMS™, the world's most advanced distribution and Transportation Management System (TMS) designed specifically for shippers with a volume of 500 truck-loads or more per year.

Our patent-pending, web-based technology tackles every distribution and shipping challenge faced by any organization.

InMotion Global TMS™ is FREE of all upfront costs and FREE of any transaction or maintenance fees. Users report savings of 11 to 17 percent or more on their transportation cost from day one - which translates to \$272 in actual average savings per load shipped. Many shippers are already saving millions of dollars annually using InMotion Global TMS™.

Connected in real-time to our 24-hour Freight Management Center (FMC), InMotion Global TMS™ provides complete logistics control, shipping support and instant access to additional freight capacity. The system is designed for complex multi-pick up and delivery loads, as well as providing load optimization, point to point routing, load tendering, reporting, Internet load tracking, driver advances, carrier lane bidding, accounting and hundreds of other features. InMotion Global TMS™ completes 100 percent of the distribution "paperwork" and business processes from load inception to delivery and facilitates all your shipping activities whether you use common carriers, company trucks, 3PLs or any combination of these.

“Shippers see an average savings per load of \$272 on day one. The more they ship - the more they save.”

*Tim Higham - CEO, InMotion Global*

“Last week at a national sales meeting, our CFO made a point of recognizing the outstanding results of the Distribution Department. InMotion Global played a key role in helping us achieve those results. I am thankful for our partnership and look forward to continued success...”

*A Top 5 National Grower*

THE WORLD'S MOST ADVANCED  
TRANSPORTATION MANAGEMENT SYSTEM

# SOME OF THE BENEFITS OF USING INMOTION GLOBAL TMS™

- Free of upfront cost. Nothing to buy, pay for what you use
- Remote desktop-to-desktop support
- Fully hosted, web based. Premise solutions also available
- Automatic D.O.E. fuel surcharge updates
- Facilitates shipping by company trucks, common carriers and/or 3PLs
- Completes all “paperwork” from load inception to delivery
- Reduces liability through real-time verification of carrier authority, insurance, safety and reliability
- Instant Internet load tendering to carriers - no paperwork
- Online tracking and tracing of loads for customers and merchandisers
- Optimizes and routes loads in minutes
- Connected to 24-hour Freight Management Center
- POD/BOL scanning available - go paperless
- Auto carrier selection based on price or performance
- EDI enabled

*“InMotion Global TMS™ has transformed our distribution and transportation efforts. It is a very user-friendly transportation management system and the transportation staff found it very easy to learn. The system allows us to reduce costs by selecting the most cost-effective carriers in the market and giving real-time access to information for all our staff, wherever they are. This unified view of our distribution efforts means we save money and can provide a superior delivery experience for our clients, who also use it to track every delivery online. InMotion Global TMS™ is much more than we expected. It has made my life a lot easier, increased productivity, and saved us money.”*

Logistics Manager, Hines

Easily manage your loads on the color-coded load board. Instantly see which loads require your full attention and monitor the progress of every shipment.

Load Number	Qty	Weight	Rate
1000	100	1000	1.00
1001	200	2000	2.00
1002	300	3000	3.00
1003	400	4000	4.00
1004	500	5000	5.00
1005	600	6000	6.00
1006	700	7000	7.00
1007	800	8000	8.00
1008	900	9000	9.00
1009	1000	10000	10.00

Instantly select which carriers can provide you with the lowest rate for a particular lane, or switch to your preferred carriers. InMotion Global allows easy carrier or driver selection in seconds.

Rate your carriers' and drivers' performance after every load to ensure that you are getting the quality that you and your customers deserve. Use performance monitoring to negotiate better rates or to shift distribution to more reliable carriers.

Save time and money on every load by letting carriers perform check calls, accept or decline tendered loads, and set their own appointments with a collaboration web-portal.

Track where your carriers and drivers go and what equipment they have available. Search for carriers based on location and available equipment while verifying their FMCSA insurance and safety records.

InMotion Global TMS™ is fully hosted and web-based requiring no software installation. Built on the Web 2.0 platform of next generation technology, it features cascading menus, predictive text typing, and an intelligent user interface. With no transaction or maintenance fees, InMotion Global TMS™ supports unlimited loads and locations at no extra cost.

InMotion Global TMS™ clients' typical net savings on a 900-mile shipment is \$272. In fact, the routing and optimization feature alone will save you money.

Millions of dollars of mature technology can be yours in minutes. Go to [www.InMotionGlobal.com](http://www.InMotionGlobal.com) for more details, and call 800-990-8283 to schedule a live demonstration today. Join some of the world's largest shippers that are already using InMotion Global TMS™ to efficiently control their product distribution.
