

LET YOUR CUSTOMERS SEE THEIR DELIVERY STATUS ... WITH LOADLINK™!

- Load tracking and tracing 24 hours a day 7 days a week
- Updates of shipments' status in real-time for your customers
- Tender loads to your carriers and drivers online
- Web-based, real-time field access from enabled phones and PDAs

LOADLINK™

LoadLink™ is just one of the many features offered through InMotion Global TMS™. With LoadLink™, your customers can track and trace loads 24 hours a day. They will access up-to-the-minute information about their loads, including: scheduled pickup times, ETAs for deliveries, appointment times, purchase order numbers, online proof of delivery documents, and many other useful pieces of information regarding the status of their loads. Your carriers and drivers will be immediately notified by e-mail with all of the necessary details of tendered loads. LoadLink™ provides full access to custom reports, tailored with the information necessary to help you maximize your time, save you money, and give you 100% visibility with regard to your shipping and logistics operations.

Your customers see only their loads and you determine additional access by transportation staff, remote company offices, sales organizations, receivers and merchandisers.

LoadLink™ was designed with your customers in mind. It will assist all members in your supply chain, from your sales force and shipping department to your customers, store locations and merchandisers. With LoadLink™, your entire supply chain and distribution effort will instantly become more effective – and efficient!

“LoadLink™ is the lifeline for our customers and store merchandisers to be able to see where the trucks are and when the deliveries have been made. It eliminates missed appointments - and more importantly - disappointments.”

Top Three Foliage Shipper, Florida

“Before using LoadLink™ we used to drive around in circles looking for the trucks. Now our field staff and merchandisers are able to see in real time when the deliveries are made. Better still, it works perfectly with all web-enabled cellular phones and PDAs, allowing delivery monitoring in the field.”

Cary Ballas, RPS

“InMotion Global TMS™ has transformed our distribution and transportation efforts. It is a very user-friendly transportation management system and the transportation staff found it very easy to learn. The system allows us to reduce costs by selecting the most cost-effective carriers in the market and giving real-time access to information for all of our staff wherever they are. This unified view of our distribution efforts means we save money and can provide a superior delivery experience for our clients, who also use it to track every delivery online. InMotion Global TMS™ is much more than we expected. It has made my life a lot easier, increased productivity, and saved us money.”

Logistics Manager, Hines

THE WORLD'S MOST ADVANCED
TRANSPORTATION MANAGEMENT SYSTEM

LOADLINK™ OFFERS...

- Load tracking and tracing 24 hours a day 7 days a week
- Updates of shipment status in real-time
- Load tendering to your carriers and drivers
- Remote and 3rd party access to load and shipment information
- Scanned proof of delivery (POD) and other shipment documents are available online to your customers
- Management of appointment setting and actual times for all pick-ups & deliveries
- Web-based, real-time field access from web-enabled phones and PDAs

Go to www.InMotionGlobal.com for more details, and call 800-990-8283 to schedule a live demonstration today.

Provide your clients, carriers and sales & merchandising staff with access to their own load details. Online access to production documentation including your scanned PODs.

Give your carriers and drivers the ability to accept or decline tendered loads over the Internet. Terms and conditions can be customized for specific clients and carriers.

Allow select carriers to set their own delivery appointments, updating InMotion Global TMS™ in real-time.

Your carriers can update their location and actual drop-off times themselves, saving you time and money.

Give your outside merchandising team or field staff the ability to see their current schedules in real-time. All available from any web-enabled PDA or phone.
